

## **NOAA WEATHER RADIO**

**The best source to receive up-to-date weather information is from a tone-alert NOAA Weather Radio. This device automatically sounds when the National Weather Service issues a severe weather watch or warning. Every home and business should have a weather radio. It is a crucial step toward safety and preparedness. Jackson County weather can be received from the Ross County tower on 162.500 MHz or Channel 5 on a NOAA Weather Radio. The FIPS code for Jackson County is 039075.**
